

# ACME School'17

## MOVIE LIGHTING

Fill in the blank: \_\_\_\_\_, Camera, Action!

This course will teach you techniques of cinema lighting!

We will have a featured guest speaker with years and years and hundreds of productions under his belt. Someone who worked their way from the bottom, made it to prominence, wore themselves out, and needs a break so they will be joining us!

With the ACME arsenal of lighting at your fingertips you will learn how to read light measurements, create “looks”, and operate 4 different types of light sources through an exhaustive array of fixtures.

**Warning: It Gets Hot!**
